To Whom It May Concern,   June 27, 2022

It is with great pleasure that I recommend Mr. Renadh Chowdhury, who served as a guest lecturer at Long Island University-POST. Students from our Data Analytics Master's program were positively captivated by how Mr. Chowdhury conducted the three sessions where he taught them Introductory Python & Web Scraping for Data Science. He came up with an interesting "*Learn-as-we-code*" model that ensured a sustained attention span and generated curiosity. During his lectures, Mr. Chowdhury assisted the students with installation, coached them the fundamental concepts of Python, web scraping using Python libraries, structuring datasets, and best coding practices. One of his most intriguing lectures was on the Robots Exclusion Protocol. While teaching them the syntax and rules of the Robots.txt file, he engaged the students into an absorbing discussion on the importance of using the file and affirming it as an essential subset of scraping practices.

He demonstrated his industry expertise, intellectual creativity and oral articulateness as he explained each line of code while referencing theoretical definition of each concept. His overall intelligence and perseverance were on show as he guided each student with well-documented information slides and debugging every issue they came across.

Mr. Chowdhury displayed his passion about programming. He has a unique teaching technique that makes his lectures vibrant, interesting and keeps his audiences engaged, inciting them to research and learn more. Our students have immensely benefitted from his sessions. His teachings have been instrumental to their capstone and research projects. He received well-deserved plaudits from all of them. At a personal level, Mr. Chowdhury is diligent, detail-oriented, well-disciplined and has a great personality, who can be an invaluable asset to both academia and the tech industry.

Best,

Dr. Syed Muhammad Ishraque Osman
Associate Professor
Data Analytics and Business Intelligence,
Long Island University-Post.
